CONTROL ROOM CONSOLES

A high-density console designed and built for a high level of security world

CHESS CONTROL ROOM CONSOLES feature a high-density profile designed and built for a high level of security world. Insight's overall depth of 600mm to 800mm saves valuable space and maximizes command center and control room functionality. Our engineers reduced the overall depth of the chase and workdesk surface on the popular technical furniture to create a compact console with an efficient footprint that meets ergonomic standards and provides fantastic desktop work space. If you are challenged for space, but want a fully functional control room console packed with features, then CHESS is your helper.
